

Mi Ami

“Echonoecho” (Quarterstick), a new 12-inch single by the San Francisco band Mi Ami, is a strange and cool record. It is slow and humid and elegant, with long notes from the bass, reggae and disco drum patterns, a singer (Daniel Martin-McCormick) shouting unintelligibly in a high voice, and echo, lots of echo. Sometimes there’s a trebly guitar — for stretches it becomes frenetic and noisy and fills up the sound picture — but otherwise this is something like a dub-reggae record gone crazy. It’s included on a full album from the band, “Watersports,” coming out in February from Quarterstick, but this is a song that deserves to be heard on vinyl.
